

University Summary Report:
Sustainability
Assessment of Student Learning for
Graduate Programs
November 2, 2021, version 1

INTRODUCTION

Special Note about COVID19: It is important to note that a significant amount of the work referenced in this report was completed during the COVID pandemic that began in the Spring of 2020 and continued in the Fall of 2021 when this report was written. This includes the collection, assessment, and analysis of student work in college courses and implementing college and University changes of which were impacted to some degree.

The Educational Effectiveness Committee, along with other academic committees such as CAPR and the ILO Subcommittee, supported ongoing reflection about student learning for mindful, flexible, and nimble decision making during this dynamic period. Additionally, teaching, learning, and assessment discussions and decision-

confidentiality reasons, the assessment results are not reported here. In addition, an “n” of one is too small to provide meaningful results. The Graduate Advisory Committee will be asked to address this issue in the future.
